

## Hikvision Optimus Connector for Vanderbilt Pro Enterprise Access Control System

Get full transparency, control and operation of Vanderbilt devices in HikCentral

Optimus is a system-level middleware product, which is committed to addressing the mapping and integration of **events**, **alarms** as well as the **data synchronization** between HikCentral & Vanderbilt Enterprise Pro (ACT) and ACTpro hardware.

This integration provides the operator with system transparency and full control from both systems. Using either control clients, operators have complete situational awareness, receive any alarms generated by both systems, and can respond and control any further actions.

ACT Enterprise is the role-based access control software suite for ACTpro hardware and streamlines the installation, management and monitoring of the ACTpro access control system. ACT Enterprise manages up to 4,000 doors and 50 PC clients.

### Integration Key Features

Importing ACT events & alarms into HikCentral

- ACT alarms & events are populated in HikCentral alarm overview
- Alarm acknowledgments are synchronized between both systems
- Link ACT alarms to HikCentral actions

Importing ACTpro hardware into HikCentral

- Add ACTpro hardware to HikCentral E-Map
- Display status of ACTpro hardware in HikCentral
- Control ACTpro doors from HikCentral Control Client or E-Map
- Link HikCentral functionality to ACT actions

Data Synchronization between ACT and HikCentral

- Users, cards, photos, groups

### Compatible with:

- Vanderbilt ACT Enterprise Pro v2.13
- Hikvision Optimus: 1.1.1
- HikCentral 1.6

### How to obtain the Vanderbilt ACT Connector

- Visit [tpp.hikvision.com/tpp/solution](http://tpp.hikvision.com/tpp/solution)
- Locate and download the connector
- Submit a Connector License Key request online using your Optimus Serial Number
- Once approved, the Connector License Key will be emailed to you
