

# JOINT VALUE BROCHURE

## CREATING COMPREHENSIVE CLOUD-BASED SECURITY SOLUTIONS TOGETHER

Bringing video surveillance, alarm panels and access control to a central dashboard and combining with AI and video analytics for enhanced decision-making

# About Tether

Tether combine hardware (a Plug and Play **Tetherbox**), an intelligent software **Platform**, and a customizable **Cloud Storage** solution to offer a solid, secure and straightforward cloud-based security solution.

Tether's Platform allows customers to manage all physical security devices across multiple sites, in one easy-to-use dashboard.

Tether are your one stop shop for all physical security, tethering new and legacy systems and constantly integrating with leading edge security and surveillance systems.

## Technical Details

<b>Solution Type</b>	VMS Cloud VSaaS
<b>Integration Protocol</b>	ISAPI
<b>Product Languages</b>	English, Spanish, Russian, Hebrew
<b>Regions</b>	Europe, North America Latin America, Asia, Africa Middle East & North Africa Oceania

### Integrated Hikvision Products

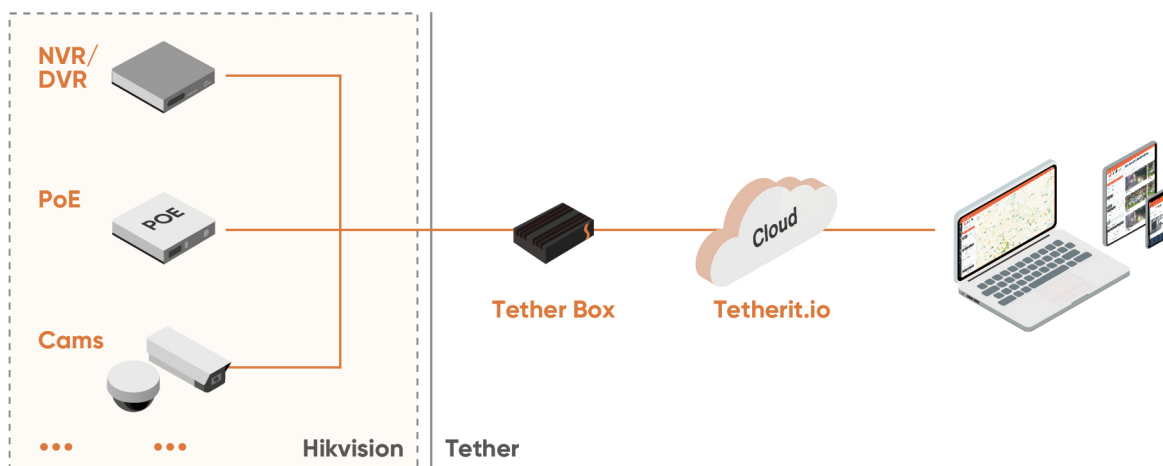

- ✓ IP, PTZ, and Thermal Cameras
- ✓ NVRs / DVRs

### Supported Product Models and Versions

Tether Platform (all versions) is compatible with all versions of Hikvision NVRs, DVRs and cameras

## Solution Architecture

- Tetherbox goes on site, connects to cameras or a recorder
- Connect to your cameras on any site, on any device, from anywhere
- Footage gets stored locally, or backs up camera/s to the Cloud
- Connect to single or multiple locations simultaneously from a single log in

# Key Benefits

**Access, monitor and manage sites remotely**  
– perfect for a COVID-safe environment

**Tetherbox** - Simple setup, no port forwarding. No Java / Active X plugins. No client software to install / configure / update. Just plug in to the network – no monitors, keyboards, mouse, router configuration or NVR configuration.

**Cloud-based Security Platform** – Timeline accessible anytime, anywhere, on any device. No software to install. No interference with IT systems. Mobile device access, both iOS and Android.

**Enable real-time health monitoring and management of key security & network**

Health monitoring beyond CCTV, including network devices, i.e., routers, switches, PoS systems, any IP devices on the network, as well as serial devices. Tether offers an enhanced level of service by monitoring other key devices, e.g. ePoS systems for the customer too.

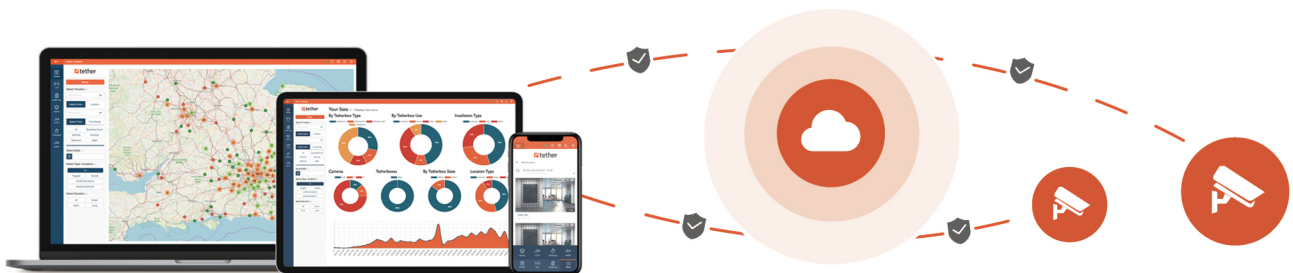

System health monitoring with alerts via email and push notifications. Makes installers aware of issues before they become problematic and often before the customer is even aware of them.

**Cloud-based Security Platform**

– Accessible anytime, anywhere, on any device

No software to install.

Secure and encrypted VPN connection secures all data flow between site, cloud and system user. By connecting Tether to your CCTV system you not only securely ringfence your cameras from external cyber attacks, you also benefit from 2-factor authentication and a full real-time audit log of who is viewing, sharing, downloading and deleting your CCTV footage.

**Cost-effective cloud CCTV solution able to cut support and administration costs by up to 70%**

Storing footage in the cloud gives you peace of mind, letting you access evidence no matter what. Whether the unit is unplugged, stolen, destroyed or simply lost on the Internet, you will still be able to see why and act on the evidence.

Tether uses intelligent cloud storage to record and log security events, with a full GDPR and DPA compliant audit log, meaning vital footage will be accessible even if CCTV devices are stolen or fire destroys on-site evidence. Tether lets customers choose which cameras to back up and for how long, without impacting internet connection.

## Flexible, scalable and affordable, with integration to many popular physical security systems

Tether is the one app for video surveillance, access control, alarm panes and cloud storage. Tether is a company that will wrap up everything onto one easy-to-use platform. The Tether Platform has proven itself to be scalable and the time it takes to manage 10, 100 or 10,000 locations is not significantly different.

## Key Features

Plug and play Tetherbox, cloud-based security platform (accessible anytime, anywhere) and optional cloud storage

Unify all sites and physical security devices into a single platform and single-view dashboard

Secure by default and automatic setup that suits 99% of installations

Central audit log to comply with GDPR and Rules of Evidence, regular audit, and health reports

Compatible with any IP camera, all Hikvision NVRs and DVRs and many other systems

## Targeted Industries (Verticals)

Banking & Finance

Retail

Healthcare

Education

Commercial

City Surveillance

Residential

Manufacturing & Industrial

Public Transportation

Logistics

## About Us

### Hikvision Digital Technology

At Hikvision, we believe that close collaboration with our ecosystem of partners is needed to further accelerate innovation and development in the security industry, while also securing maximum value creation for clients.

We work in close partnership with hundreds of best of technical manufacturers of hardware and software systems in the security, automated manufacturing, and IoT industries. Our Technology Partner Program ensures that our clients can use Hikvision technologies knowing that we provide vendors with the tools to obtain comprehensive integration and compatibility with all our products.

### Tether Technology

Tether are a British technology company revolutionizing the physical security industry by bringing the Cloud to it. Tether solidly and securely tether video surveillance, alarm panels and access control and bring it all into a straightforward central dashboard so it can be monitored, managed and maintained in one place, accessible anytime, anywhere.

Tether are non-proprietary and vendor agnostic, have an open API platform, and will integrate with any security device they come across. Tether constantly develop new surveillance and analytics integrations with leading-edge technologies so that customers don't have to.
